

## Crafts

### Feather Necklaces

(From early learning ideas)

#### Supplies:

- colorful feathers (or any clean feathers)
- colorful card stock paper
- bird stickers
- pony beads
- string or lacing cord
- tape
- glue stick
- breakaway clasps

#### How To Assemble Feather Necklaces:

- To make the necklaces I started by cutting a bunch of circles from scraps of colored card stock. You certainly don't have to use a circle...use whatever shape or material you choose.

- Then, we taped feathers to one side of a circle.

- Next, we glued another circle on top of the feathered circle to create a little sandwich. You can also sandwich feathers between foam shape stickers.
- Once we punched a hole into the circle and added a string, the feather medallions were ready to be decorated with stickers, washi tape, or drawings.
- Finally, beads were added to the string. Helpful Hack.... Use painter's tape to hold the necklace to the table so that kids won't pick up the necklace and send beads flying all over the place. For safety, add a breakaway clasp to the end of the strings.
